War Risks

The Swedish Club

Proactive and Reliable Loss Prevention
The Swedish Club – Loss Prevention
**Our approach to Loss Prevention**

- Loss prevention initiatives designed to add value to our members in their efforts to reduce the number of claims.
- Initiatives are easy to implement in the daily operations of our members.
- Focus is on providing members with concrete hands on advice.
Loss Prevention areas of focus

- Navigational claims
- Cargo claims
- Peoples claim
- Machinery damage
Cargo claims

  - Trade Enabling Loss Prevention (TELP)
  - Monthly Safety Scenario (MSS)

- **Proactive information:**
  - Member alerts
  - Publications and guidance

*The Swedish Club Philippine Pre-Engagement Medical Examination (PEME)
** The Swedish Club Operations Review (SCORE)
Loss Prevention initiatives

Joakim Enström
Loss Prevention Officer
Does your emergency response plan really work?

Emergency Response Training

The Club can create a variety of scenarios:

- Grounding and wreck removal
- Cargo damage
- Salvage and pollution
- Collision
- Tendering and repair
- Forum shopping
- Legal and medical scenarios

Realistic emergency scenarios that test response and responsibility
Monthly Safety Scenario (MSS)

The Swedish Club

MONTHLY SAFETY SCENARIO

Calendar 2020

The Swedish Club has published a series of Monthly Safety Scenarios (MSS) to help you comply with international safety regulations and to make your workplace as safe as it can possibly be.

These tear-off worksheets have been designed to assist you with your monthly safety meetings and are based on real life incidents that have occurred on board other vessels. You can use the discussion points on the reverse of each worksheet to help you during the meetings, and to send feedback to your shore based colleagues, if required.

1. What are the immediate causes of this accident?
2. Is there a duty that the type of accident could happen on our vessel?
3. Who would suffer most from an accident like this?
Upcoming publications

• Container focus
  - Preventing the loss of containers at sea
• Cargo Claims Analysis
Navigation claims analysis

Maritime Resource Management (MRM) in brief

Lorraine M. Hager
Loss Prevention and Marketing Advisor
Decision making
What is Maritime Resource Management (MRM)?

• A human factors training programme aimed at the maritime industry

• Aims at preventing accidents at sea caused by human error
Maritime Resource Management (MRM)

The MRM programme fosters:

• Positive and constructive attitudes
• Good personal communication
• Leadership excellence
• Compliance with operating procedures

Proactive and Reliable Loss Prevention
And leads to:

• Reduced accidents and incidents
• Increased situation awareness
• Effective management of available resources
• Improved onboard communication
• Less complacency
• Effective implementation of standard operating procedures

Training method

Computer-Based Training (CBT)

Application (bridge/engine ‘mock-up’)

Workshops

Case studies
The MRM course is designed to minimise the risk of accidents and incidents by ...

...encouraging safe and responsible behaviour
How do we apply the MRM concepts?
Feedback from our members

“Safety in our DNA” states
Mr. Rob Grool, CEO Zeaborn Ship Mgmt.

- “The strength of MRM is that it puts constant emphasis in making the best use of all available skills on board and on challenging unsafe acts before they become disasters.
- And ‘all available skills’ also means awareness of unsafe practices about to happen or taking ownership of a quality/safety issue until it has been resolved. “

“It’s a ‘value for time’ course” says
Mrs. Amalia Marcou
Crew/HR Manager, Enesel Ltd.

- “It gives new impulses to the team and takes a totally different approach about how to deal with and manage human error.”
